Designer and Visual Communicator by the National Autonomous University of Mexico, UNAM. I have been in the creative industry since 2011 designing mostly web and UI/UX products. However, in the last year I have been working a lot in the fields of Concept Art and Illustration, both freelance and in studio.

My skills are hard working, team working, attention to details and to never ever stop learning new techniques, technologies and knowledge so I can keep growing as an artist and deliver better products on each project I get the chance to work on.
